Natural Heritage & Climate: a new interdisciplinary course in Circle U

Didone Frigerio, University of Vienna
Matylda Guzik, University of Oslo
Marcel Robischon, Humboldt Univ. Berlin
Federico Niccolini, University of Pisa

Introduction

- Preserving natural heritage is a major sustainability challenge
- Sustainable development of societies is a complex topic
- As a such, it requires transdisciplinary approaches that integrate knowledge and skills from various domains

Conclusion

Natural Heritage sites

- provide cross-disciplinary learning opportunities
- enable experiential learning, fieldwork, and research projects.

**The course invites students to explore Natural Heritage
as a mean to understand climate change
and sustainable management**

**Co-funded by
the European Union**
