

Addressing ideological threats at Circle U. campuses

Impact on Student Life and Representation

Extremist ideologies weaken student life by cutting support for representation and targeting marginalized groups. This creates an unsafe campus, with rising attacks on student representation, highlighting the need for stronger protection of academic freedom.

Funding Challenges

Political extremism has led to underfunding of higher education, with budgets often prioritized for business or military needs. CUSU opposes targeted cuts, urging universities to allocate funding to enhance academic value, not profit, and support international courses.

Challenges to International Mobility and Integration

Extremist ideologies threaten student mobility by raising fees for non-nationals and cutting funding. Stricter immigration laws limit cultural exchange and diversity. Universities must prioritize mobility, international programs, and housing for a global campus.
